Saying Chinese Words

Characters and pinyin (which spell out the sounds of Chinese words) are included on these flash cards. Most pinyin words are pronounced the same as in English. The variations are included on a pronunciation guide card.

In Mandarin Chinese you also must use tone to pronounce the words correctly. There are four tones. The first tone is level and written like (-). Second tone starts low and rises and is written like (´). Third tone starts high, falls and then rises again and is written like (ˇ). The fourth tone starts high and then falls. It is written like (`).
